ABOUT US

Prime Nation Supply is a project-based sourcing and commercial intelligence partner supporting construction projects.

We collaborate closely with owners, design teams, contractors, and suppliers to help align sourcing decisions with overall project objectives.

Our focus is on clarity and coordination across the supply ecosystem.

By connecting design intent with supplier capabilities and supply conditions early in the process, we support smoother decision-making across design, execution, and procurement.

Prime Nation Supply operates as an external strategic layer, providing insight into cost, availability, and lead times without interfering with existing roles or responsibilities.

This allows project teams to move forward with greater confidence and predictability.

With a strong focus on multi-family housing projects, we support developments where scale, coordination, and timing are critical to success.

Our approach helps transform sourcing into a structured and reliable part of the overall project workflow.

At Prime Nation Supply, we believe successful construction projects are built through well-aligned decisions, shared understanding, and strong coordination throughout the project lifecycle.

ENGAGEMENTS

Prime Nation Supply works across construction projects as a horizontal sourcing partner, bringing early sourcing insight and coordination to key stakeholders.

With Owners

Early sourcing clarity, budget alignment, and risk visibility—supporting confident strategic decisions.

With Designers

Specification-aware sourcing and compliant alternatives—keeping design intent intact and buildable.

With Contractors

Procurement support, lead-time clarity, and package-level sourcing—reducing pressure during execution.

With Suppliers

Coordinated project-based sourcing - delivering predictable supply instead of reactive procurement.

SUPPLY SOLUTIONS

Our approach to multi-family housing focuses on delivering reliable material solutions across interior, exterior and supporting categories to ensure efficient execution.

Interior

- Wall Panels & Profiles
- Interior Doors & Frames
- Flooring Solutions
- Kitchen & Storage Systems
- Bathroom & Sanitary

Exterior

- Windows & Facade Systems
- Cladding Systems
- Exterior Doors
- Outdoor Living
- Site Elements

Supporting Materials

- Thermal & Acoustic Insulation
- Construction Chemicals
- Installation & Fixing Materials

INTERIOR SOLUTIONS

Wall Panels & Profiles

Decorative and functional wall panel and profile solutions for interior spaces.

Interior Doors & Frames

Interior door and frame systems designed for multi-family residential units.

Flooring Solutions

Durable flooring systems suitable for residential units and shared interiors.

Kitchen & Storage Systems

Integrated kitchen cabinetry and built-in storage solutions for housing projects.

Bathroom & Sanitary

Sanitary ware, shower enclosures, and complete bathroom system solutions.

WALL PANELS & PROFILES

Our Interior Wall Panels add depth, character, and elegance to modern spaces, enhancing interiors with a natural and refined aesthetic.

In line with our commitment to sustainability, all panels are crafted from 100% recyclable materials using eco-friendly production methods.

Designed for long-term performance, they are durable, water-resistant, and protected against moisture and pests.

Easy to install and maintain, they offer thermal insulation and hygienic properties, creating healthier and more sustainable living environments.

- Decorative wall panels
- Acoustic wall panels
- Wall profiles & moldings

DECOLUX
Architectural Design Elements

DECORATIVE WALL

PANELS

Our Decorative Wall Panels create dynamic surfaces through layered textures and clean lines, offering flexible design possibilities. Suitable for a wide range of interior applications, they combine aesthetic value with durable performance.

ACOUSTIC WALL

PANELS

Designed to improve sound quality while enhancing interior aesthetics, our Acoustic Wall Panels reduce noise and echo, creating more comfortable and balanced spaces. Their layered structure supports acoustic performance without compromising visual appeal, making them suitable for residential interiors.

WALL PROFILES AND MOLDINGS

Designed to define transitions and add architectural detail, our Wall Profiles & Moldings create clean lines and refined finishes across interior surfaces. They provide functional edge protection while enhancing spatial continuity, offering versatile solutions for modern interior applications.

INTERIOR DOORS & FRAMES

Our Interior Doors and Frames combine elegance, durability and functionality to complement any interior. Crafted from high-quality materials, they ensure smooth operation, precise installation and long-lasting performance.

With a range of finishes and designs, they offer flexibility for both residential and commercial spaces, bringing comfort and refined style to modern interiors in a wide range of styles and finishes, perfectly suited for both classic and contemporary designs.

- Interior Stile & Rail Doors
- Interior Molded & Flush Doors
- Interior Louver Doors
- Door Frames & Casings
- Unit Entry Doors (with fire - rated option)

INTERIOR STILE & RAIL

DOORS

Designed with classic frame construction, Interior Stile & Rail Doors offer timeless aesthetics combined with structural durability. Their detailed profiles and balanced proportions bring architectural character while ensuring reliable everyday performance.

INTERIOR MOLDED & FLUSH DOORS

Combining clean surfaces with durable construction, Interior Molded & Flush Doors provide versatile solutions for modern interiors. Their minimalist design allows seamless integration across residential and commercial spaces.

INTERIOR LOUVER

DOORS

Interior Louver Doors enhance air circulation while maintaining visual continuity. Ideal for utility areas and closets, they balance ventilation needs with refined interior design.

DOORS FRAMES &

CASING

Door Frames & Casings deliver precise installation and clean transitions between walls and doors. Engineered for durability, they complete door systems with cohesive detailing and long-lasting performance.

UNIT ENTRY DOORS

Unit Entry Doors are designed for enhanced security, acoustic comfort, and durability. Available with fire-rated options, they meet safety requirements while maintaining refined interior aesthetics for residential and commercial applications.

FLOORING SOLUTIONS

Our Flooring Solutions combine style, durability, and practicality to enhance any interior space. Designed for residential and commercial projects, they provide long-lasting performance while maintaining a refined, modern aesthetic.

Crafted from high-quality materials, our floors are resistant to wear, moisture, and daily use, offering easy installation and low maintenance. Available in a variety of textures, finishes, and designs, they suit both classic and contemporary interiors, delivering comfort, elegance and functionality.

- SPC Flooring
- LVT Flooring
- Engineered Wood Flooring

SPC FLOORING

SPC Flooring offers exceptional stability and water resistance, making it ideal for high-traffic residential and commercial spaces. Its rigid core structure ensures durability, easy installation, and long-term performance.

LVT FLOORING

LVT Flooring combines realistic surface textures with flexible performance. Designed for comfort underfoot, it delivers moisture resistance and low maintenance while offering a wide range of design options.

ENGINEERED WOOD

FLOORING

Engineered Wood Flooring brings the natural beauty of real wood with enhanced dimensional stability. Its layered construction provides durability and consistent performance, adding warmth and elegance to interior spaces.

ENGINEERED WOOD FLOORING

ENGINEERED WOOD

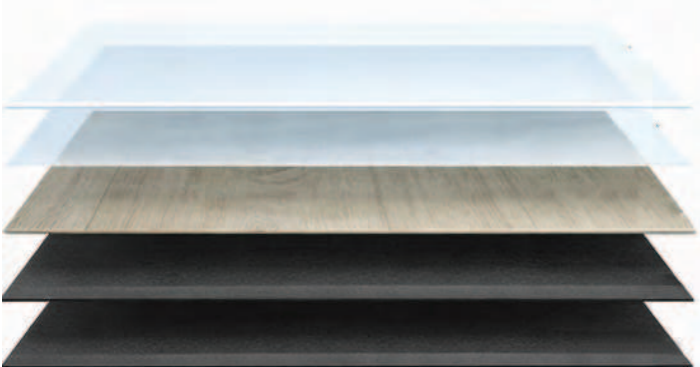

- UV COATING
- WEAR LAYER
- VENEER LAYER
- CORE LAYER
- STABILIZING BACKING

SPC FLOORING

- UV COATING
- WEAR LAYER
- COLOR FILM
- SPC CORE
- FOAM OR CORK

LVT FLOORING

- UV COATING
- WEAR LAYER
- DECOR FILM
- LVT CORE SHEET
- LVT BALANCE SHEET

Each flooring system is engineered with multiple performance layers, combining surface protection, structural stability, and visual quality. From UV-coated wear layers to rigid cores and stabilizing backing, every component contributes to durability, comfort, and long-term reliability across residential and commercial applications.

KITCHEN & STORAGE

SYSTEMS

Our Kitchen and Storage Systems are designed to combine functionality, organization, and style, creating efficient and elegant spaces. Crafted from high-quality, durable materials, they ensure long-lasting performance while enhancing the overall interior design.

With a variety of configurations, finishes, and modular options, our systems provide customizable storage solutions that adapt to both residential and commercial kitchens, maximizing space utilization and convenience.

- Kitchen cabinets
- Storage cabinets
- Countertops
- Built-in wardrobes
- Closet systems

KITCHEN CABINETS

Designed for everyday functionality, Kitchen Cabinets combine durable construction with clean design lines, offering organized storage and seamless integration into modern kitchen layouts.

STORAGE CABINETS

Storage Cabinets deliver flexible organization across living spaces, combining practical capacity with durable materials for long-term performance.

COUNTERTOPS

Countertops are crafted for durability and daily use, providing resistant surfaces that complement cabinetry with functional elegance and refined finishes.

BUILT-IN WARDROBES

Built-in Wardrobes provide customized storage solutions tailored to interior layouts, maximizing space efficiency while maintaining a refined and cohesive appearance.

CLOSET SYSTEMS

Closet Systems offer modular configurations that adapt to individual storage needs, creating organized, accessible, and visually balanced interiors.

BATHROOM &

SANITARY

Our Bathroom and Sanitary Products combine style, functionality, and durability to enhance modern bathrooms. Crafted from high-quality materials, they are designed for long-lasting performance, hygiene, and ease of maintenance.

Available in a variety of finishes, designs, and configurations, our products provide flexible solutions for both residential and commercial projects, delivering comfort, elegance, and reliability in every space.

- Sanitary ware
- Shower enclosure systems
- Bathroom fixtures
- Bathroom furniture

ISVEA
1962 ITALIA

alupedia

SANITARY WARE

Sanitary Ware products are designed for hygiene, durability, and everyday comfort. Crafted from high-quality materials, they provide reliable performance while maintaining clean, refined bathroom aesthetics.

SHOWER ENCLOSURE

SYSTEMS

Shower Enclosure Systems combine precise engineering with minimalist design, creating clear, functional shower spaces. Their durable structures ensure water resistance, easy maintenance, and long-term usability.

BATHROOMS

FIXTURES

Bathroom Fixtures deliver efficient water control and lasting performance, blending modern design with practical functionality for residential and commercial bathrooms.

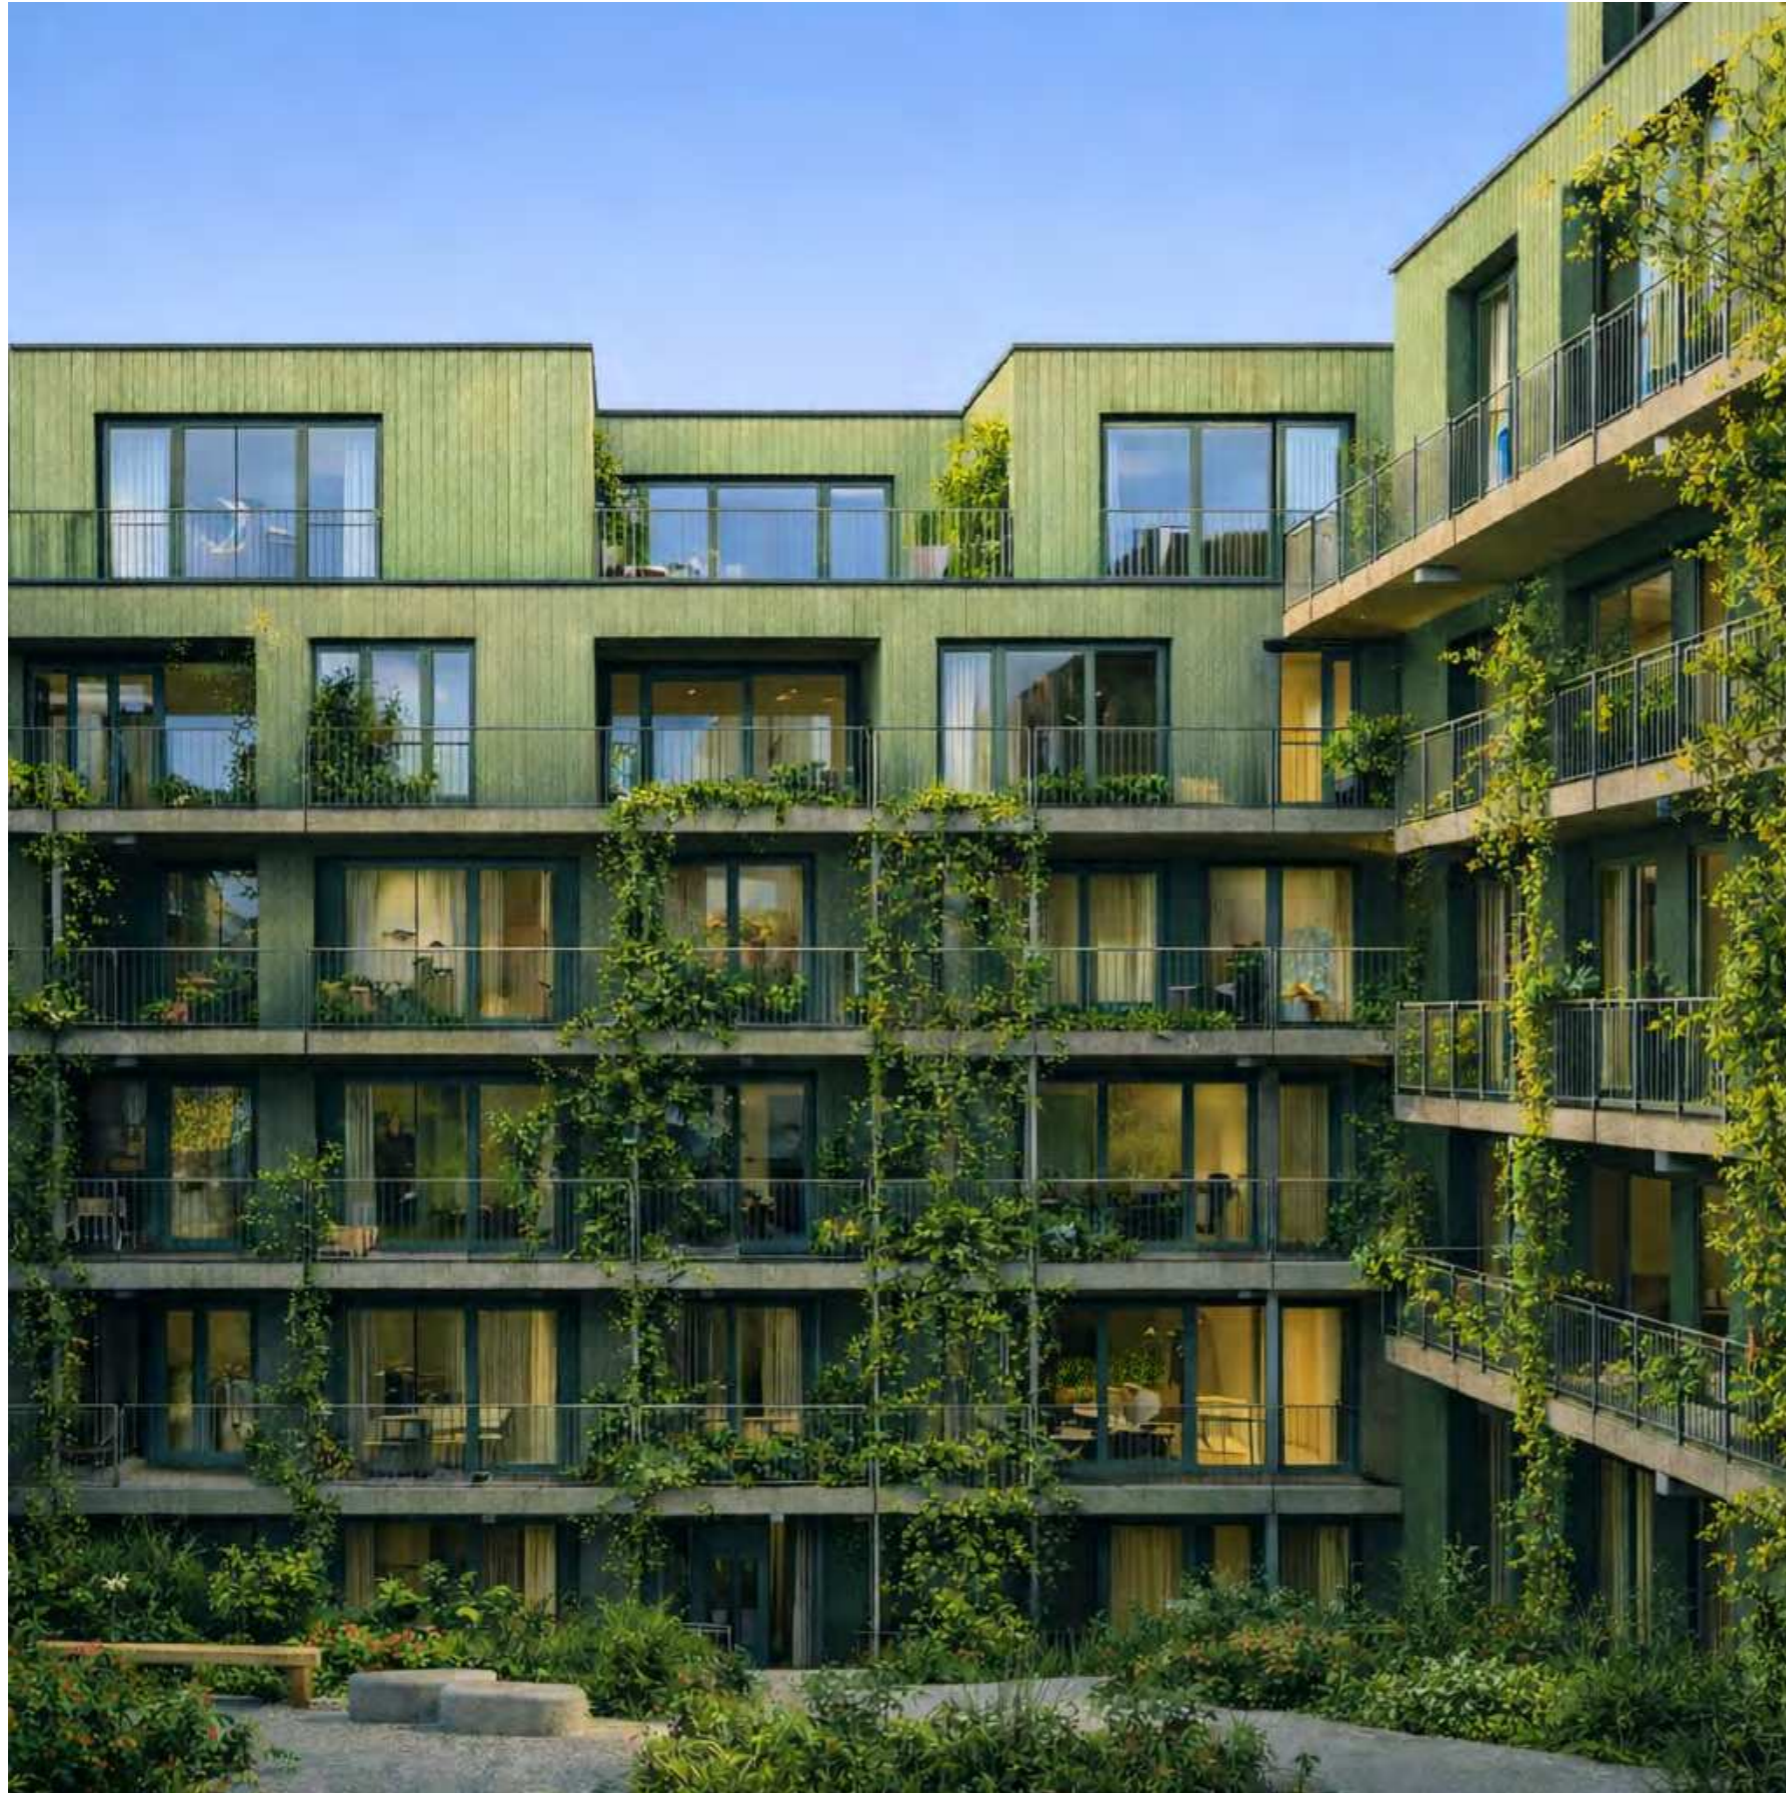

BATHROOM

FURNITURE

Bathroom Furniture offers organized storage solutions with moisture-resistant construction, enhancing bathroom interiors with functional layouts and refined finishes.

EXTERIOR SOLUTIONS

Windows & Facade Systems

Glazed exterior systems providing daylight, views, and connection between interior and exterior spaces.

Cladding Systems

Exterior systems defining the architectural character and weather protection of the building.

Exterior Doors

Exterior access systems designed for security, durability, and life-safety requirements.

Outdoor Living

Shared outdoor systems enhancing comfort and usability of exterior amenity spaces.

Site Elements

Exterior ground and edge systems organizing circulation, separation, and safety.

WINDOWS & FACADE

SYSTEMS

Our Windows and Facade Systems combine functionality, energy efficiency, and design to enhance both comfort and aesthetics. Crafted from high-quality materials, they provide durable, low-maintenance solutions that protect interiors while optimizing natural light.

Available in a variety of styles, opening types, and glass options, our systems offer flexible design solutions for residential and commercial projects, delivering visual appeal, ventilation, and energy savings.

- Window systems
- Hinged Door Systems
- Sliding door systems
- Window wall systems
- Curtain wall systems
- Storefront systems

WINDOW SYSTEMS

Window Systems are designed to maximize natural light, thermal performance, and ventilation. With durable profiles and flexible opening options, they provide efficient and reliable solutions for residential and commercial interiors.

HINGED DOOR

SYSTEMS

Hinged Door Systems combine robust construction with smooth operation, offering secure and practical access solutions. Their versatile designs adapt easily to different architectural styles and spatial requirements.

SLIDING DOOR SYSTEMS

Sliding Door Systems create seamless transitions between interior and exterior spaces. Engineered for smooth movement and large openings, they enhance spatial continuity while optimizing daylight and views.

WINDOW WALL

SYSTEMS

Window Wall Systems deliver expansive glazing solutions with high energy performance. Designed for modern façades, they balance transparency, insulation, and structural efficiency.

CURTAIN WALL

SYSTEMS

Curtain Wall Systems provide high-performance façade solutions for contemporary architecture. Their modular design supports large-scale glazing, ensuring durability, weather resistance, and refined visual impact.

STOREFRONT SYSTEMS

Storefront Systems offer clear, open façades for commercial spaces, combining visibility with structural stability. Designed for flexibility and easy installation, they enhance street-level engagement and architectural expression.

CLADDING SYSTEMS

Our Cladding Systems combine aesthetics, durability, and performance to enhance building exteriors. Designed with high-quality materials, they provide long-lasting protection against weather while creating a modern and sophisticated appearance.

Available in a variety of materials, textures, and finishes, our systems offer flexible design options for both residential and commercial projects, ensuring energy efficiency, low maintenance, and striking visual impact.

- Technowood
- Aluminum Panels
- Aluminum Siding
- Composite Panels
- Vinyl Siding
- Sintered Stone
- Rainscreen Systems
- Cladding Sub-Structure & Profiles

technowood

TECHNOWOOD

Technowood cladding combines the natural appearance of wood with enhanced durability and weather resistance. It delivers a warm architectural expression while ensuring long-lasting performance and low maintenance for exterior applications.

ALUMINUM PANELS

Aluminum Panels offer lightweight strength and high resistance to environmental conditions. Their clean surfaces and precise detailing create modern façades with durable and low-maintenance performance.

ALUMINUM SIDING

Aluminum Siding provides continuous façade solutions with strong protection against weather and corrosion. Designed for efficiency and durability, it ensures consistent performance with a refined exterior appearance.

COMPOSITE PANELS

Composite Panels combine layered materials to deliver high structural stability and design flexibility. Suitable for contemporary façades, they offer durability, thermal efficiency, and a smooth visual finish.

VINYL SIDING

Vinyl Siding offers cost-effective exterior protection with reliable resistance to moisture and fading. Its lightweight structure ensures easy installation and long-term durability with minimal maintenance.

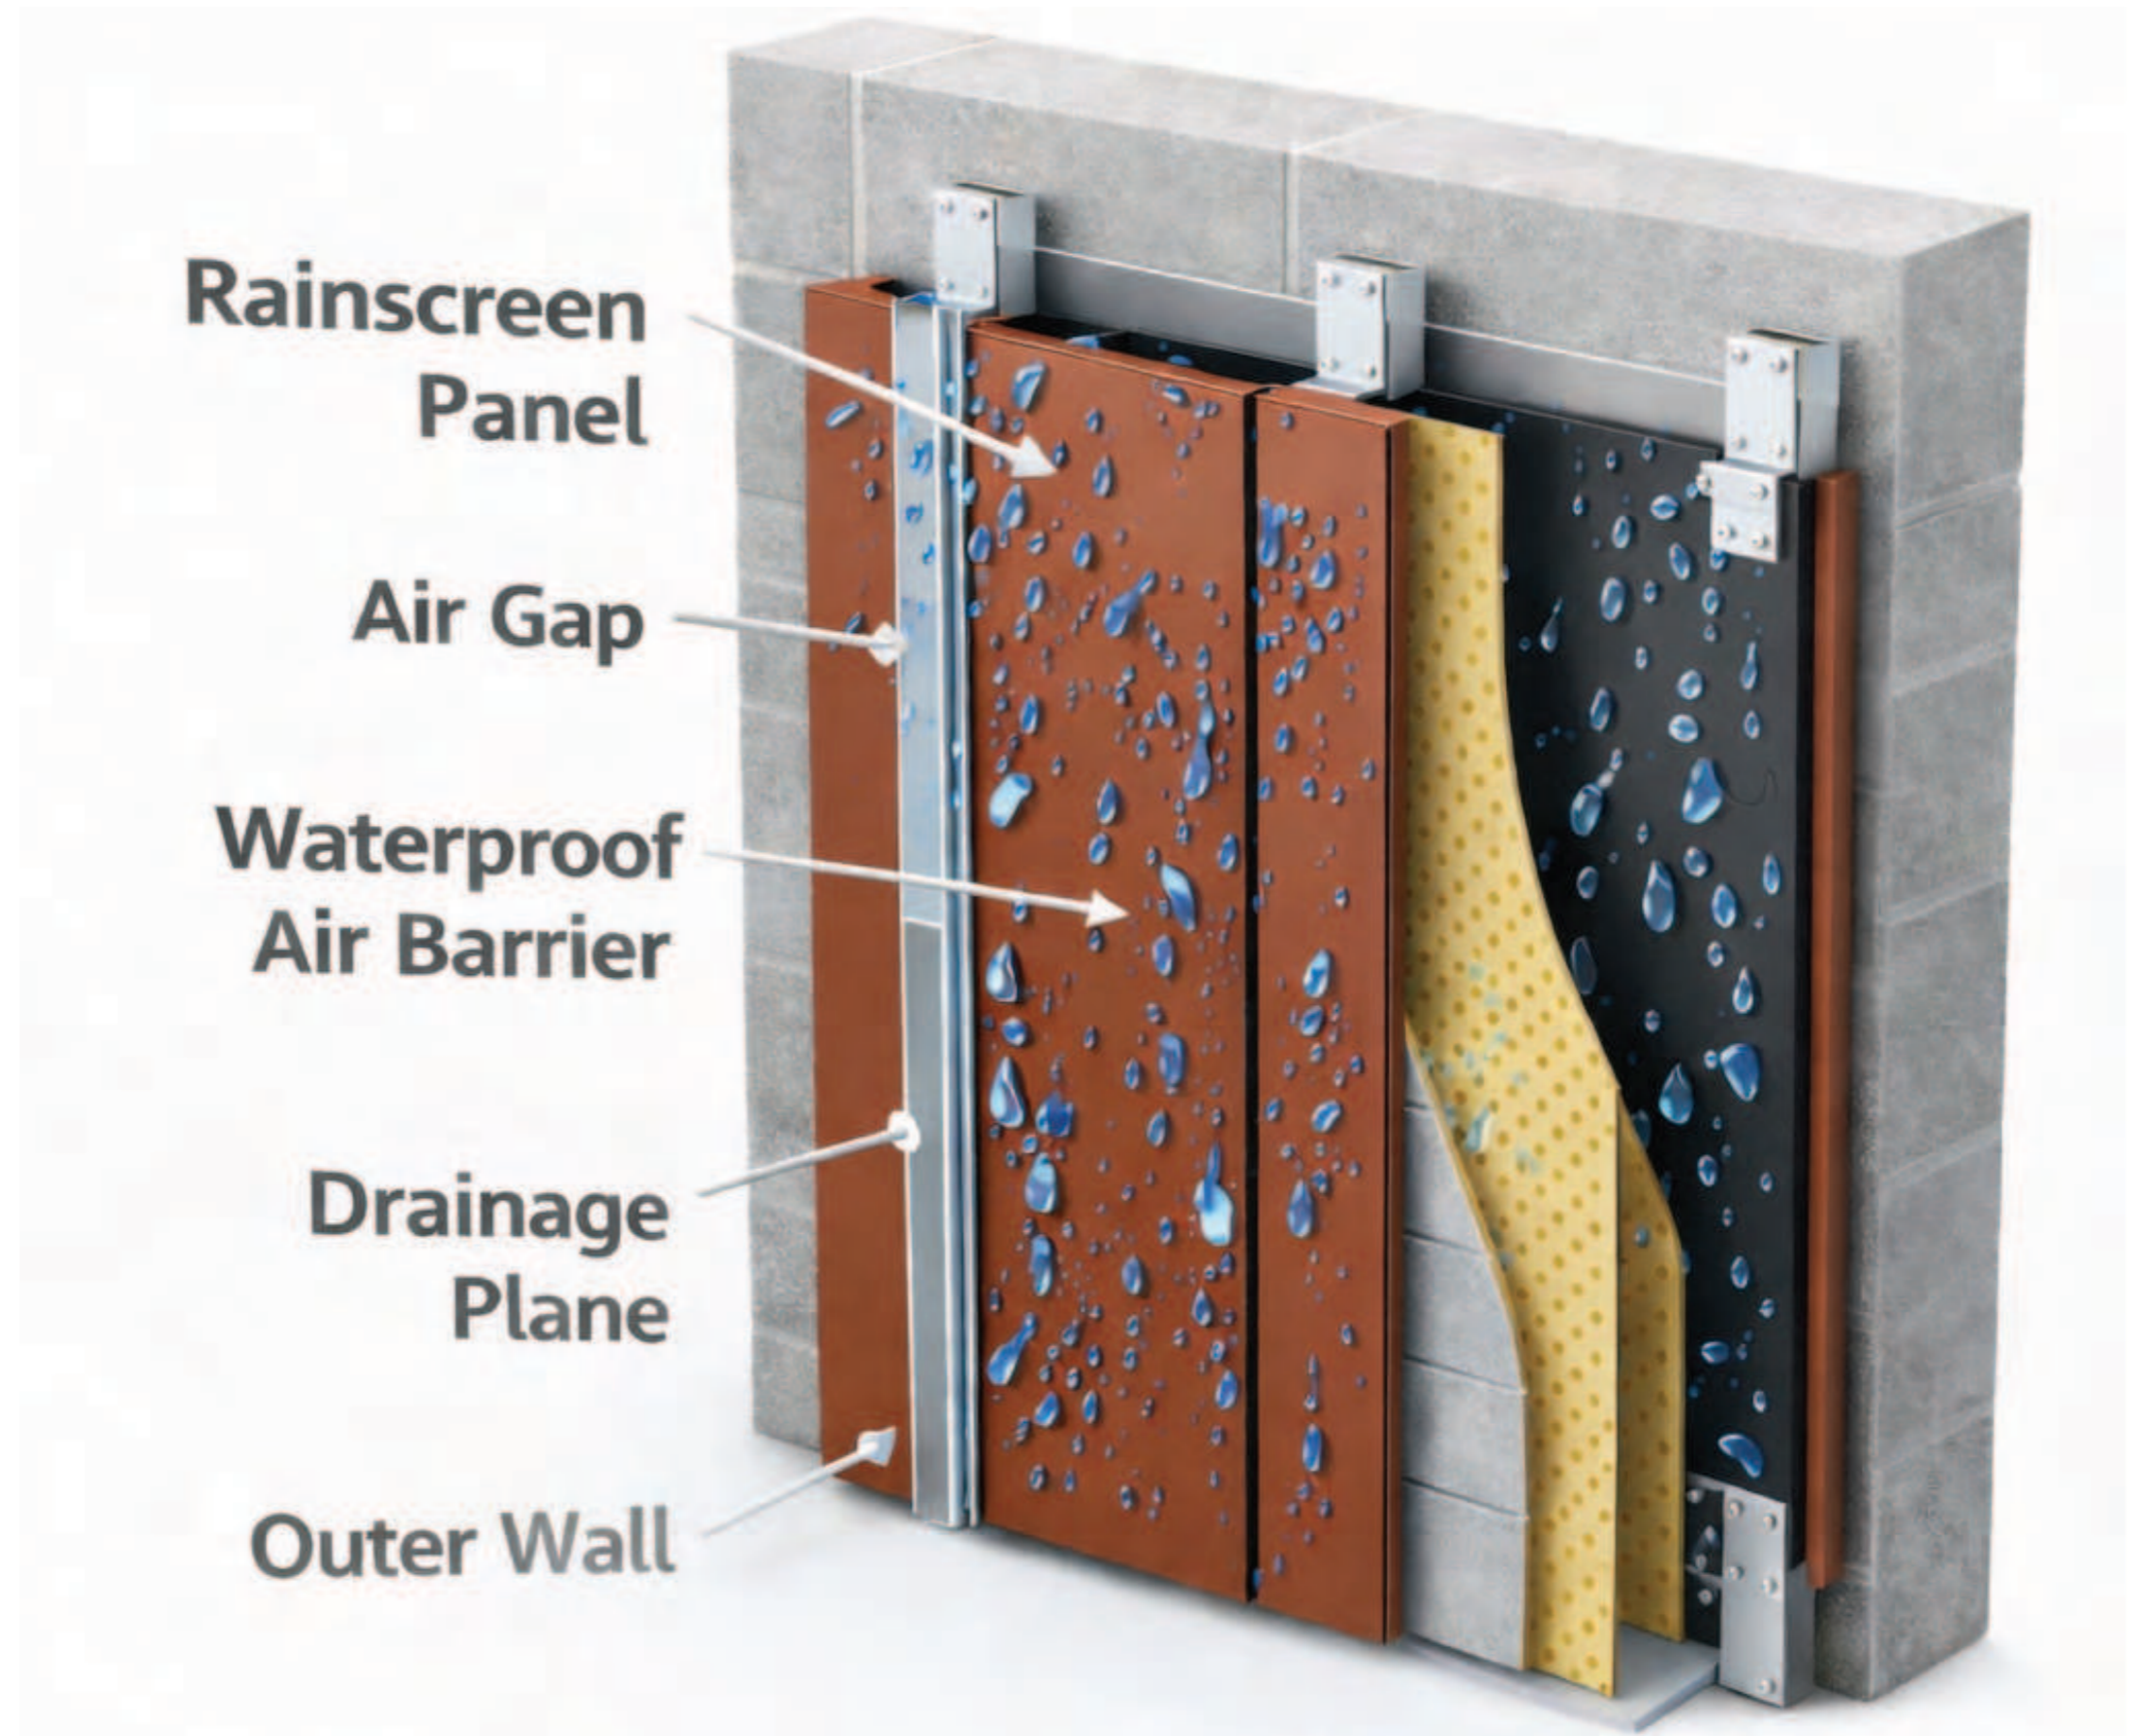

SINTERED STONE

Sintered Stone cladding delivers exceptional strength, weather resistance, and color stability. Its refined surface quality provides a premium architectural finish for high-performance exterior façades.

RAINSCREEN SYSTEMS

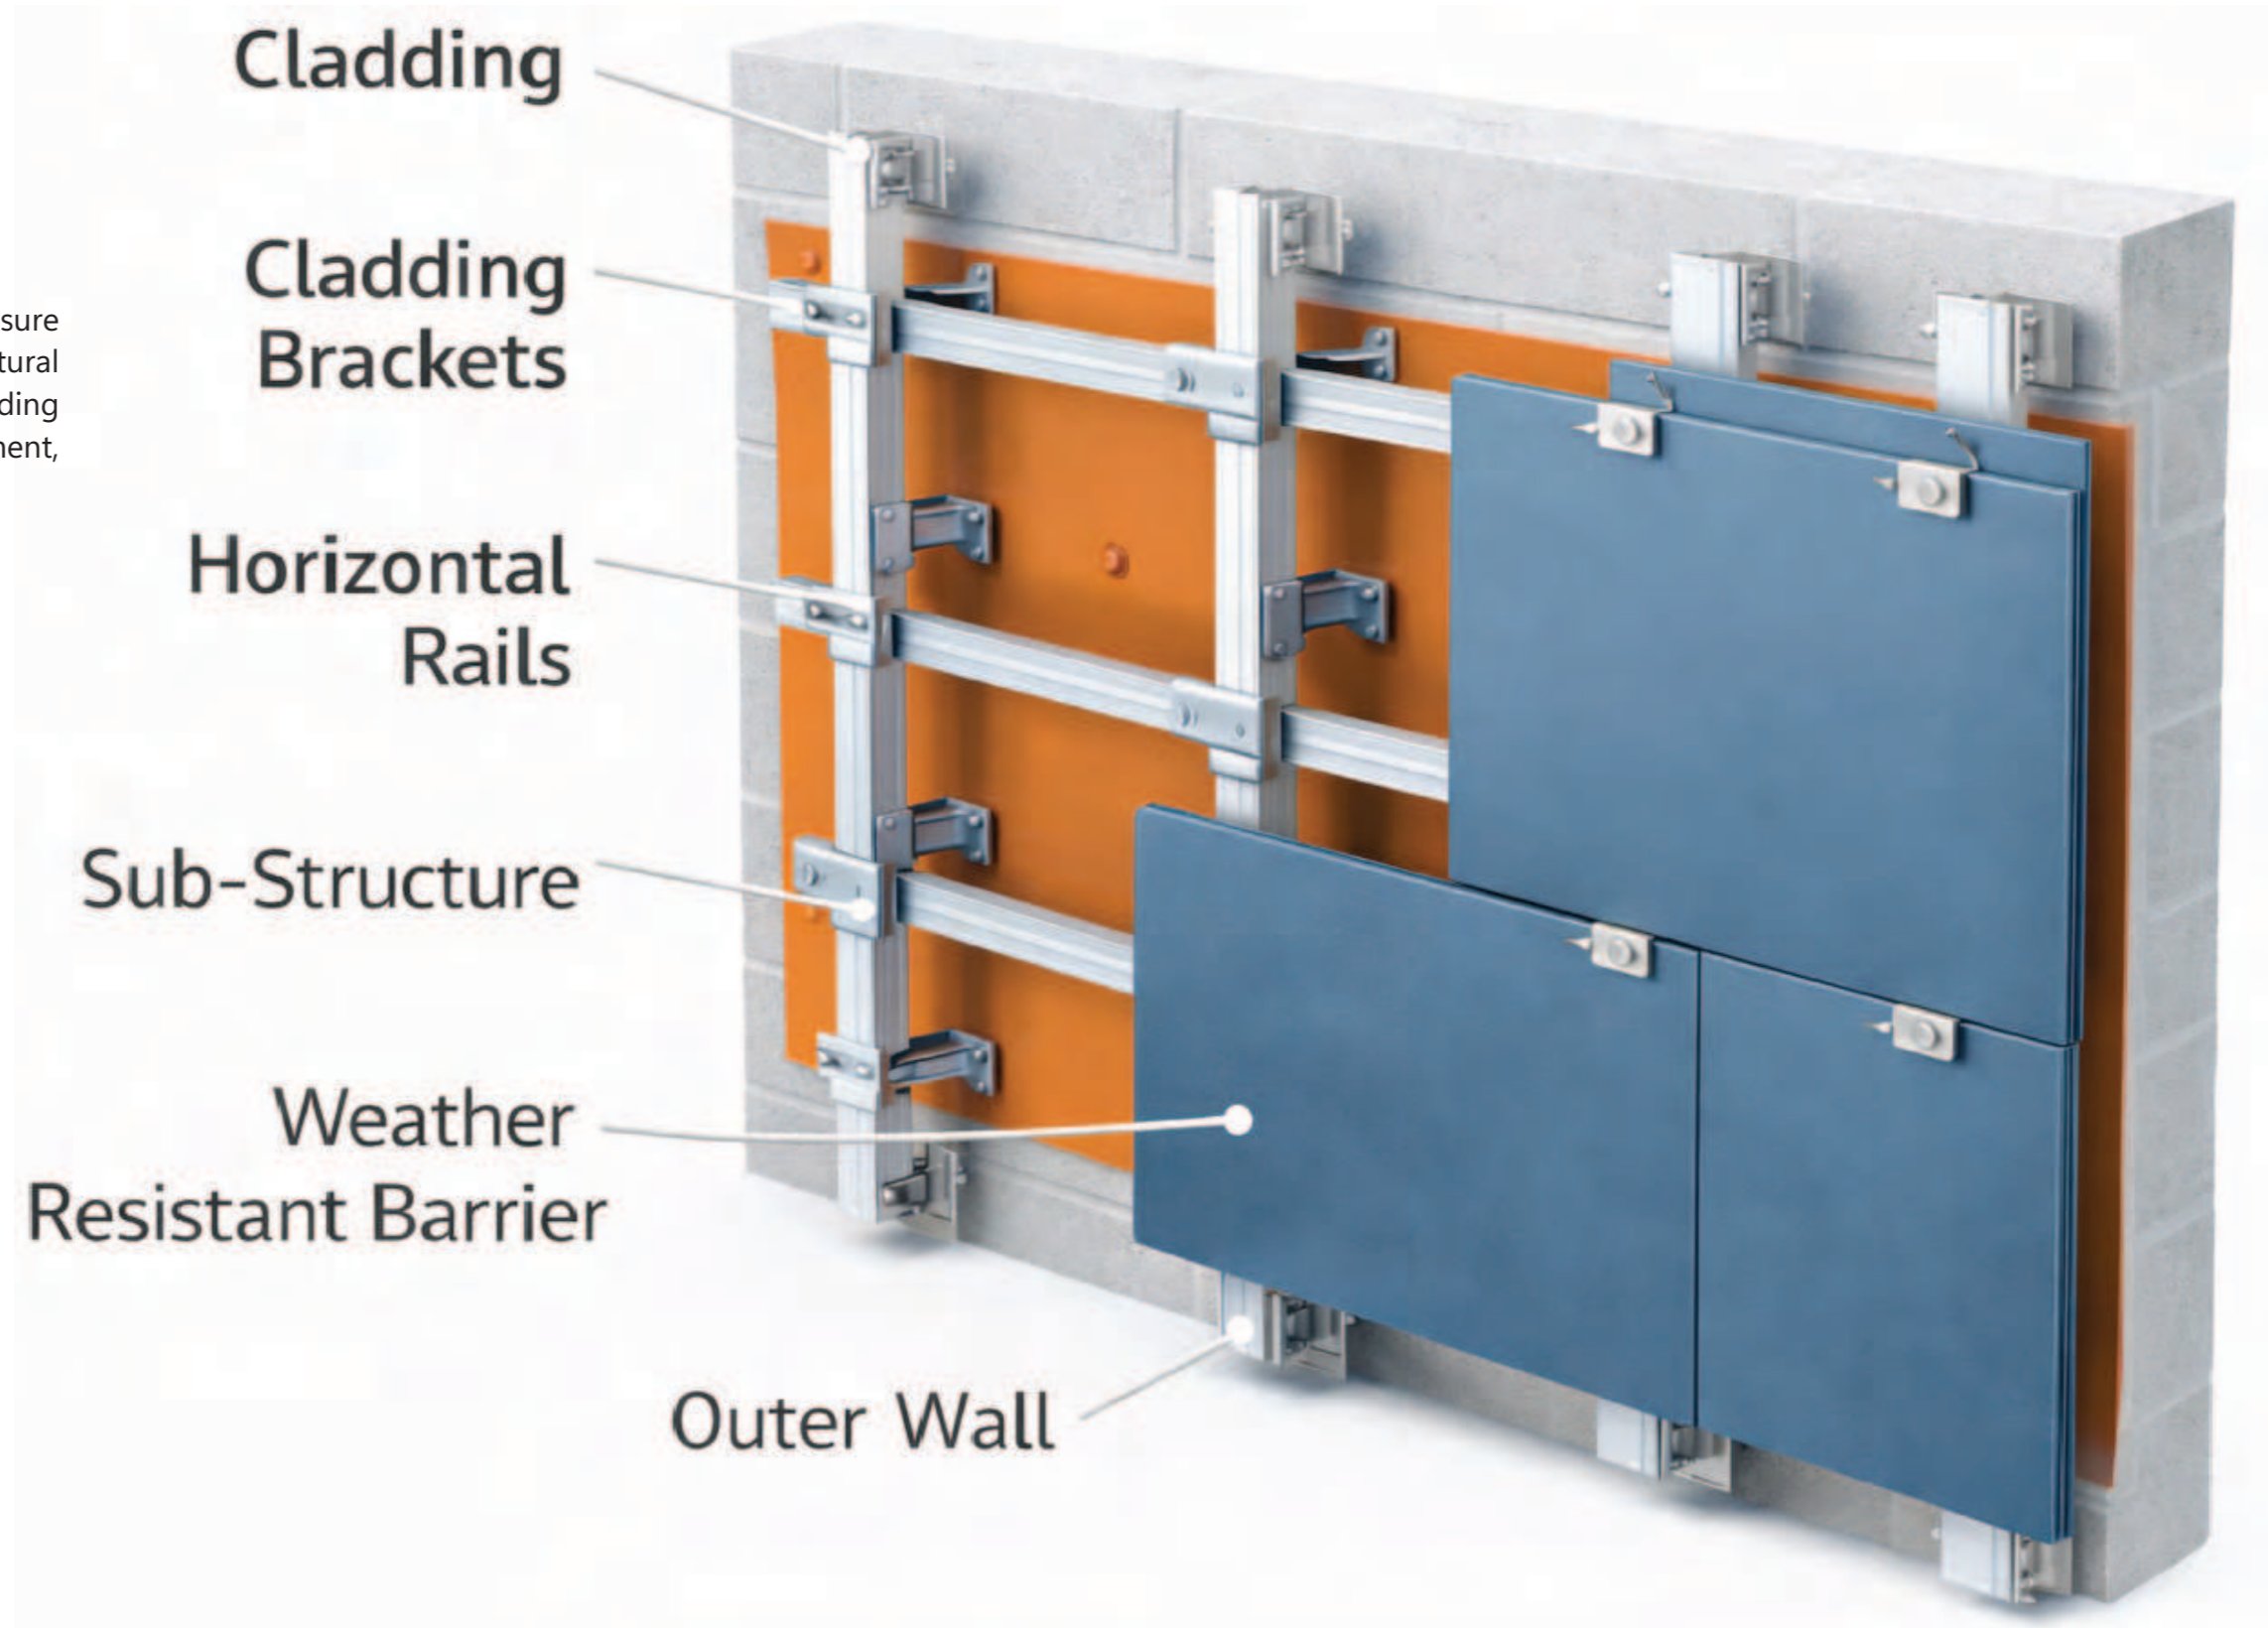

Rainscreen Systems improve building performance by managing moisture, ventilation, and thermal efficiency. Designed as layered façade solutions, they enhance durability while supporting modern architectural design.

CLADDING

SUB-STRUCTURE & PROFILES

Cladding Sub-Structure and Profiles ensure precise installation and long-term structural stability. Engineered to support various cladding materials, they provide reliable alignment, ventilation, and load distribution.

EXTERIOR DOORS

Our Exterior Doors combine security, durability, and style to enhance the entrance of any building. Crafted from high-quality materials, they provide long-lasting performance, weather resistance, and low maintenance.

Available in a variety of finishes, designs, and opening types, our doors offer flexible solutions for residential and commercial projects, delivering safety, elegance, and a welcoming first impression.

- Main Entrance Doors
- Lobby Entrance Doors
- Service & Utility Doors
- Emergency Doors
- Fire-rated Exterior Doors

MAIN ENTRANCE

DOORS

Main Entrance Doors are designed to create a strong first impression while providing high levels of security and durability. Their refined finishes and robust construction enhance building entrances with lasting performance.

LOBY ENTRANCE

DOORS

Lobby Entrance Doors combine elegance and functionality, offering smooth access and visual continuity in shared spaces. Designed for high-traffic areas, they ensure durability while maintaining a welcoming appearance.

SERVICE & UTILITY

DOORS

Service & Utility Doors provide practical and secure access for operational areas. Engineered for durability and weather resistance, they deliver reliable performance in demanding exterior environments.

EMERGENCY DOORS

Emergency Doors are designed to ensure safe and efficient evacuation. Their robust construction supports reliable operation while meeting safety and performance requirements.

FIRE - RATED EXTERIOR DOORS

Fire-rated Exterior Doors offer enhanced protection by meeting fire safety standards while maintaining exterior durability and visual quality. Designed for critical access points, they support safety without compromising design integrity.

OUTDOOR LIVING

Our Outdoor Living solutions combine design, comfort, and durability to create inviting exterior spaces. Crafted from high-quality, weather-resistant materials, they provide long-lasting performance while enhancing the aesthetics of gardens, patios, and terraces.

With a variety of furniture, pergolas, and modular systems, our offerings deliver flexible and stylish solutions for both residential and commercial outdoor environments, making every space functional, elegant, and enjoyable.

- Pergola systems
- Bioclimatic pergolas
- Shading systems
- Wind breaker systems
- Outdoor furniture
- Outdoor lighting

PERGOLA SYSTEMS

Pergola Systems create defined outdoor spaces by providing shade and structural comfort. Designed for durability and visual balance, they enhance terraces and gardens with functional elegance.

BIOCLIMATIC SYSTEMS

Bioclimatic Pergolas offer adjustable climate control through movable louvers, allowing light, ventilation, and protection to be managed throughout the day. Engineered for comfort, they support year-round outdoor use.

SHADING SYSTEMS

Shading Systems provide effective sun control while enhancing outdoor comfort. Designed to reduce heat and glare, they deliver flexible solutions for various exterior applications.

WIND BREAKER

SYSTEMS

Wind Breaker Systems protect outdoor areas from wind without obstructing views. Their durable construction ensures comfort and usability in open-air environments.

OUTDOOR FURNITURE

Outdoor Furniture combines ergonomic design with weather-resistant materials, offering comfortable and stylish solutions for long-lasting outdoor use.

OUTDOOR LIGHTNING

Outdoor Lighting enhances safety and ambiance by highlighting architectural elements and landscapes. Designed for exterior durability, it creates functional and inviting outdoor environments after dark.

SITE ELEMENTS

Our Site Elements combine design, functionality, and durability to enhance outdoor spaces. Crafted from high-quality, weather-resistant materials, they provide long-lasting performance while complementing landscaping and architecture.

- Decking Systems
- Entry Mat Solutions
- Fencing Systems
- Railing Systems

¹³
alupedia

DECKING SYSTEMS

Outdoor Lighting enhances safety and ambiance by highlighting architectural elements and landscapes. Designed for exterior durability, it creates functional and inviting outdoor environments after dark.

ENTRY MAT

SOLUTIONS

Entry Mat Solutions help protect interior spaces by effectively trapping dirt and moisture at entrances. Engineered for durability, they combine practical performance with a neat and organized appearance.

FENCING SYSTEMS

Fencing Systems provide secure boundary solutions while supporting visual continuity in outdoor environments. Designed for durability and weather resistance, they balance protection with refined exterior design.

RAILING SYSTEMS

Railing Systems ensure safety without compromising aesthetics. Their robust construction and clean detailing enhance balconies, staircases, and terraces with reliable performance and modern design.

SUPPORTING MATERIALS

Thermal & Acoustic Insulation

Insulation materials supporting thermal efficiency and acoustic performance.

Construction Chemicals

Adhesives, sealants, and waterproofing products supporting construction systems.

Installation & Fixing Materials

Fixing, fastening, and mounting materials supporting all building applications.

THERMAL INSULATION

Our Thermal and Acoustic Insulation solutions enhance comfort, energy efficiency, and indoor well-being. Made from high-quality, sustainable materials, they provide effective thermal regulation and sound control for residential and commercial buildings.

Designed for easy installation and long-term performance, our insulation products deliver energy savings, reduced noise, and healthier interior environments, supporting both sustainable and comfortable living spaces.

- Stone wool insulation
- Mineral wool insulation
- EPS / XPS insulation
- Insulation Membranes

CONSTRUCTION

CHEMICALS

Our Construction Chemicals deliver reliability, performance, and durability across a wide range of building applications. Formulated from high-quality materials, they enhance adhesion, protection, and longevity of construction works.

Designed for ease of application and long-term effectiveness, our products provide solutions for waterproofing, sealing, bonding, and surface protection, ensuring quality, safety, and efficiency in every project.

- Adhesives
- Sealants
- Waterproofing products
- Surface preparation materials

INSTALLATION & FIXING MATERIALS

Our Installation and Fixing Materials provide reliable, durable, and efficient solutions for all construction and interior applications. Crafted from high-quality materials, they ensure secure assembly, precise alignment, and long-lasting performance.

Designed for ease of use and versatility, our products support smooth installation processes, helping professionals achieve quality results with speed and confidence.

- Fixing & fastening systems
- Anchors & mechanical fixings
- Mounting accessories
